Dear Sir/Mdm

TECHNICAL REQUIREMENTS FOR HOUSEHOLD SHELTERS 2017

As part of our continuous review process, SCDF and BCA jointly completed reviewing the Technical Requirements for Household Shelter (TR HS) in October 2017. The review covered all chapters of the TR HS with the aim to ensure that the TR HS are relevant and provide greater design flexibility to building industry.

2. Among others, the new edition of TR HS 2017 incorporates the permissible variations that have been allowed since the issuance of TR HS 2012 (e.g. precast HS, shielding walls in-lieu of setback distance, gas/water risers and RC refuse chutes within setback envelope, etc.), align the structural design requirements to Eurocode standard and provide new initiatives for greater design efficiency and flexibility (e.g. thinner precast reinforced concrete shielding wall, HS located around internal staircase, etc.)

3. The TR HS 2017 edition will be published in SCDF’s website (refer to the web-link below) and shall take effect on 1 June 2018. However, developers and QPs may incorporate the provisions in the TR HS 2017 with immediate effect if they choose to do so.

4. Please convey the contents of this circular to members of your Institution/Association/Board. The circular is also available in CORENET-e-Info: [http://www.corenet.gov.sg/einfo](http://www.corenet.gov.sg/einfo). For any inquiry or clarification, please contact the undersigned at 6848 1478.

Yours faithfully,

(transmitted via e-mail)
