BEHAVIOURAL SAFETY FOR THE CONSTRUCTION INDUSTRY

Safety is influenced by a number of factors such as workplace environment, management’s commitment to safety, attitude or behaviour of working personnel towards safety, etc. Workers’ positive behaviour towards safety is considered one of the key factors in preventing accidents at workplaces. A successful introduction of behavioural safety process, focusing on identifying and reducing unsafe behaviour and reinforcing safe behaviour is one means of improving safety at workplaces. Behavioural Safety is a methodology used to improve safety culture through change of behaviour of working personnel in an organisation. This methodology has been applied successfully in other industries like petrochemical and manufacturing and is gaining popularity in the construction industry.

DEVELOP A RISK MANAGEMENT IMPLEMENTATION PLAN (BIZSAFE LEVEL-2)

Workplace Safety and Health (Risk Management) Regulations require stakeholders such as employers, self-employed persons and principals to have the responsibility of identifying safety and health hazards at the workplace and taking appropriate actions to eliminate the hazards or mitigate the risks associated with the hazards. Risk assessment and management is the key to reduce the risks at source. Participant who attends this course will have an in-depth understanding and knowledge on the concepts and methodologies of risk assessment and management. This course will also provide hands-on experience in the risk assessment for construction activities and development of risk management implementation plan.

Companies participating in this programme will gain recognition and benefit from having a comprehensive WSH system in place. To start the bizSAFE journey, an enterprises top management has to sign up for this bizSAFE Level 1.
### BUILT ENVIRONMENT AND PROPERTY PROSPECTS SEMINAR 2018

The global cyclical recovery continues. Economies of China, USA and Eurozone are showing signs of recovery. Nearer to home, ASEAN economies such as Indonesia and Malaysia are projected to remain resilient, riding on healthy domestic demand and sustained improvement in exports. While the global economic recovery is expected to continue, global political risks remain from uncertainties over policies of the US administration and on-going Brexit negotiations. Against this backdrop, how will the built environment in Singapore perform in 2018? What are the opportunities, challenges and prospects for the Singapore built environment? How should companies prepare themselves during such unpredictable times? What should built environment firms look out for locally and beyond Singapore? Once again, the seminar brings together prominent economist, policy makers and industry experts to address these burning questions.

SPECIALIST DIPLOMA IN DESIGN FOR MANUFACTURING & ASSEMBLY (DFMA)

Design for Manufacturing and Assembly (DfMA) is helping revolutionise construction, making it faster, safer and more reliable. It is a process whereby buildings are designed for ease of off-site manufacturing and efficiency of on-site assembly. To enjoy the benefits of DfMA for construction industry, practitioners will need to re-think its project design approaches and construction processes. This programme aims to equip industry professionals with the knowledge and skills to apply DfMA principles in construction projects, so as to achieve higher construction productivity.

BACHELOR OF CONSTRUCTION MANAGEMENT (BUILDING)(HONOURS)

The Bachelor of Construction Management (Building)(Honours) will equip you with the skills and knowledge to manage complexities in construction projects both in Singapore and across the world. The programme incorporates substantial Building Information Modelling (BIM) teaching and projects which offer a niche specialty beyond the construction management discipline. This would give the graduates a solid foundation to pursue wide career choice as BIM Managers, Project Managers, Quantity Surveyors and Facility Managers. The degree programme is conceptualised to be a problem-based learning pedagogy to train students to solve real world challenges, develop holistic understanding of construction project environment and portable life-long learning skills. To offer an accelerated pathway, an advanced standing articulation would be eligible for students with relevant diploma qualifications.
