Dear Sir/Madam,

PROVISION OF ADEQUATE COMMON AREAS FOR MEETING FIRE SAFETY REQUIREMENTS

Recently, there is an increasing trend in the building industry towards reducing common areas for the purpose of creating more saleable spaces for new developments. Such practice may result in following non-compliance of fire safety requirements:

a. no cross ventilation for fire fighting lobby in Purpose Group II single staircase developments;

b. insufficient space for fire fighting lobby;

c. inadequate separation distance between exit staircases; and,

d. inadequate external space for ventilation of exit staircase and smoke stop lobby, etc.

(See Annex A for the diagrammatic illustrations)

2. SCDF would like to remind developers/qualified persons that they should not maximize saleable spaces at the expense of fire safety requirements. They should take into consideration the cost of complying with all fire safety requirements at the tendering and designing stage of their development projects.
